

HERCA Multi-Stakeholder Workshop on "Generic Justification", Paris, 24-26 October 2016

Plenary Session 3:

Shall the regulator define a “Standard Medical Practice List”, in which all ICRP level 2 justified types of practice are listed?

Steve Ebdon-Jackson, Hanne N. Waltenburg

***HERCA-Working Group
on Medical Applications***

"Standard Medical Practice list"

- Classification scheme of different "types of medical practices"
- All types of practices addressed
- How can this approach contribute to the justification process of new types of practices?

“Standard Medical Practice list”

- Initiation of regulatory process
 - Pro-actively?
 - Re-actively?
- Measures to support regulatory process?
 - Expert panel on permanent basis
 - Relevant stakeholders involved case by case

"Standard Medical Practice list"

- What is the impact of granularity in this approach?
- Fine
 - Detailed method
 - Device
 - Radiopharmaceutical
 - Clinical indication
- Coarse
 - Overall method
 - E.g. CT
 - Class of exams

"Standard Medical Practice list"

- What role may referral guidelines play in this approach?

Plan for this session
